FOR OUR MEMBERS INFO:

Australian Tax Office Recognizes The Barter Exchange Industry

It is certainly an exciting point in the history of Barter Exchanges in Australia as the Australian Tax Office has released a publication outlining significant points to consider by organizations involved in a Barter Exchange. We are very excited that the ATO has endorsed our E Banc Trading philosophy 'Right Price Trade Component Negotiable'. Here is a very important extract from the publication

"For tax purposes, we consider one trade dollar (T\$1) equal to one Australian dollar (\$1), unless it can be shown that the T\$1 is being traded consistently at a different value or the amounts paid or received for goods or services do not reflect the real commercial value of the goods or services. If the consideration attributed to the supply does not reflect the real commercial value of the supply, the credits attributed to the supply convert to the GST-inclusive market value of that supply."

Another serious point to consider is that superannuation cannot be paid in Trade Dollars. E Banc Trade fully endorses the findings and this publication as released from the Australian Tax Office. You can read the entire release [here](#).

E Banc Trade is committed to working with the Australian Government to create a fair and equitable Trade Exchange industry and we will continue to assist the Government as best we can.
